5. Academic and Research Interests (1985-present)

My past and present research interests focus on:

- Structural and self-assembly of fibrous proteins of complex, physiologically important, biological tissues such as fish and insect chorion (eggshell) for the elucidation of the principles governing protein structure, function and interactions (Supervisor Prof. S. Hamodrakas).
- Use of TEM and SEM electron microscopy, freeze-fracturing and freeze-etching to visualize the fibrillar arrangement of chorion proteins in fish and insects and discern their architecture at molecular level.
- Use of Biophysics methods such as laser-Raman, IR Spectroscopy, X-ray crystallography, and X-ray diffraction, for the elucidation of the principles governing protein structure, 3D folding, interactions and function.
- Biochemical analysis of the chorion constituent proteins (PAGE electrophoresis).
- Application of computer programs and use of algorithms, sequence alignment, periodicities and biological databases for the analysis of protein sequences and prediction of their secondary and tertiary structures.
- Development of genetic testing protocols and molecular diagnosis for genetic disorders such as tuberous sclerosis and Neurofibromatosis type 1. Use of molecular techniques such as isolation of DNA, Polymerase Chain Reaction, (PCR), Reverse Transcriptase, (RT), western blotting and cancer cell cultures. (Supervisor Dr. G. Voutsinas at "Environmental Mutagenesis and Carcinogenesis Laboratory, Demokritos Biology Research Institute", Greece).
- Research on neurodegenerative diseases, genetic diseases, sexually transmitted infections, and cancer.
- Environmental health issues, impact of climate change on public health, sustainability and research on green roofs.
- Innovative ways of teaching and learning in Higher Education, in STEM and Medical Education.
- Use of Artificial Intelligence in Biomedical sciences.
- Digital health and literacy, personalized medicine, and healthcare.
- Global Burden of Disease Network (GBD) studies as a GBD Senior Collaborator.
