SENTIMENT ANALYSIS

#### Methods and Data:

The sentiment measure per shipping segment is constructed by the sum product of the frequency of each keyword during the past 2 weeks with its weight for fourteen keywords with positive market sentiment connotation, minus the sum product of the frequency of each keyword during the past 2 weeks with its weight for fourteen keywords with negative market sentiment connotation. A proprietary search algorithm software is used to calculate the frequencies of the selected keywords from articles in TradeWinds per shipping segment.

# 1 Market Value data as of before market open

Balance Sheet data as of June 30, 2024

\*\* Balance Sheet data as of September 30, 2024

\*\*\* Balance Sheet data as of December 31, 2024

## Methods and Data:

The market capitalization (P) is calculated as total shares outstanding multiplied by the share price. Net Asset Value (NAV) is calculated as total assets minus net book value of vessels plus total market value of vessels minus total liabilities. The total shares outstanding, share price are extracted from Bloomberg database. The total assets, net book value of vessels and total liabilities are extracted from U.S. Securities and Exchange Commission archive financial data. The total market value of vessels is extracted from Vessels value database.

#### Methods and Data:

The Trade Working Capital (TWC) is calculated as Current assets minus total cash minus current liabilities plus current debt, over total assets. TWC > 0 indicates Trade Debit whereas TWC < 0 implies Trade Credit. Current assets, total cash, current liabilities, current debt, and total assets are extracted from U.S. Securities and Exchange Commission archive financial data.

# Legend:

- (1) Balance Sheet data as of December 31, 2024
- (2) Balance Sheet data as of September 30, 2024
- TBA Current quarter data to be announced
- Absence of common stock repurchase for the quarter

#### Methods and Data:

The stock repurchase is calculated as the amount of stock buyback divided by the weighted average number of common shares outstanding, basic. Amount of stock buybacks and weighted average number of common shares outstanding, basic, are extracted from Earnings Releases filed with U.S. Securities and Exchange Commission.
